

Did You Know?

COVID-19 Symptoms are Similar to Concussion Symptoms in Students!

Your School Needs the Teacher Acute Concussion/COVID-19 Tool (TACT)

The TACT, originally developed to guide teachers post-concussion, can now be utilized to guide teachers post-COVID-19 -- after all, the symptoms, and therefore, the INTERVENTIONS are similar! The TACT provides teachers with just-in-time, on-line, customized, academic supports based upon WHAT, HOW & WHEN they teach the student returning to school after COVID-19. The TACT takes less than 5 minutes to complete, requires no advance training, & automatically sends teachers 4 weeks of COVID-related academic supports via email

Created By Educators, For Educators!

Have confidence knowing your teachers are quickly and appropriately supporting the needs of students who struggle with COVID-19 symptoms that interfere with learning

The TN Dept of Health has already purchased the TACT for every school in TN. Contact Brain Links at

tbi@tndisability.org to get the TACT for your teachers NOW!
